

NOTE: File too large to upload to GitHub

Database: World Wide Imports (Microsoft Sample Database)

To Load Database into Azure Data Studio:

Download WideWorldImporters-Standard.bacpac

From: <https://github.com/Microsoft/sql-server-samples/releases/tag/wide-world-importers-v1.0>

https://objects.githubusercontent.com/github-production-release-asset-2e65be/53698446/c0a84048-2d71-11e6-8241-560256ebf6a7?X-Amz-Algorithm=AWS4-HMAC-SHA256&X-Amz-Credential=AKIAIWONJYAX4CSVEH53A%2F20220511%2Fus-east-1%2Fus-east-1%2Faws4_request&X-Amz-Date=20220511T162537Z&X-Amz-Expires=300&X-Amz-Signature=b73d6ce00a3b9db53fc46a6c4f3aab12fcc88c98509a17335dc0f617334576dd&X-Amz-SignedHeaders=host&actor_id=89279513&key_id=0&repo_id=53698446&response-content-disposition=attachment%3B%20filename%3DWideWorldImporters-Standard.bacpac&response-content-type=application%2Foctet-stream

To Load into Azure Data Studio:

In Extensions, Install SQL Server Dacpac

Load .bacpac file using SQL Server Dacpac by Pressing Ctrl+Shift+P and searching for Data-tier Application wizard

- Follow the Wizard and select “Create a database from a .bacpac file”
